

# AutoYield AI - Visual Wafer Inspection Report

Inspection ID: TEST-123

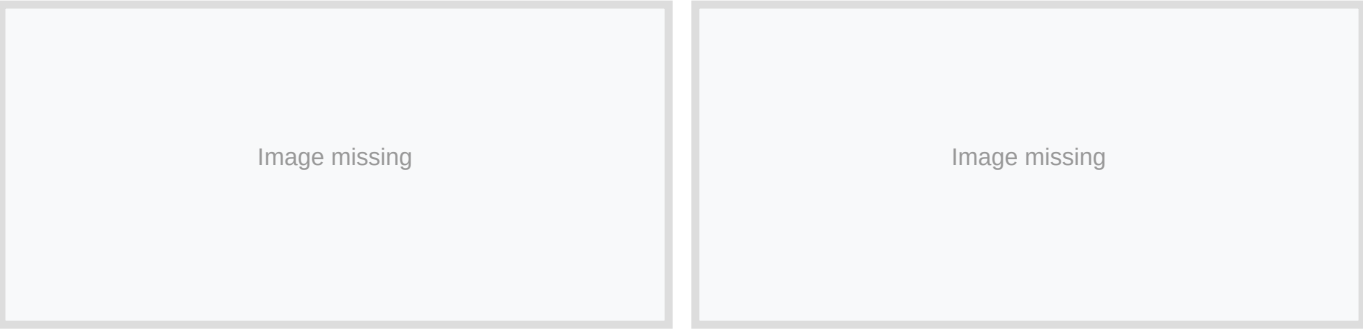

Generated: 2026-03-14T10:00:00Z

|                        |                           |                        |
|------------------------|---------------------------|------------------------|
| DEFECT CLASS<br>CENTER | CONFIDENCE SCORE<br>84.0% | SEVERITY LEVEL<br>HIGH |
| DRIFT STATUS<br>CLEAR  | INFERENCE TIME<br>128 ms  | YIELD RISK<br>HIGH     |

## Prediction Confidence Distribution

## Explainability Visualization & AI Insight

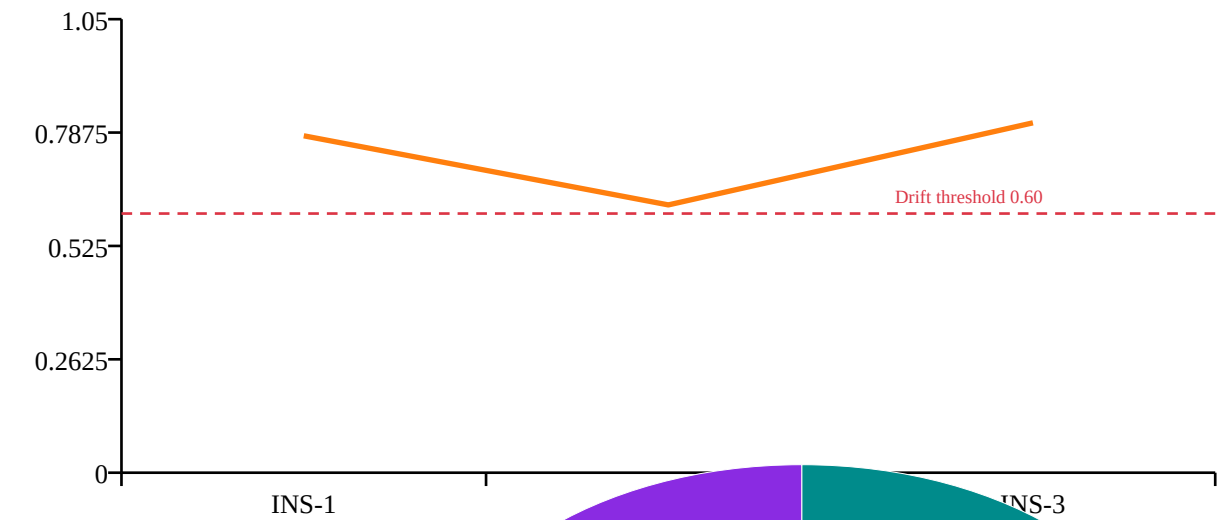

Hotspots detected: 3  
Activation spread: 0.42  
Dominant region: Center

**Generative AI Insight**  
Activation concentrates in the center zone.

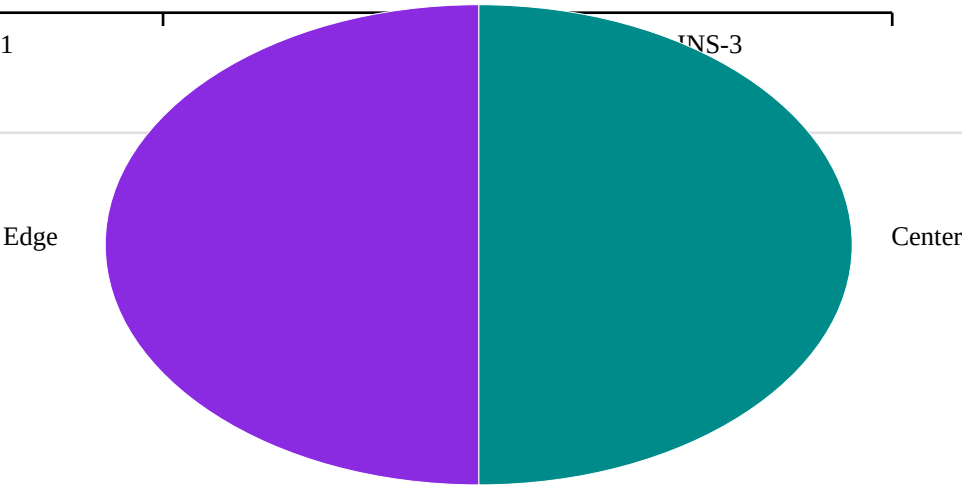

AutoYield AI Inspection Report

Inspection ID: TEST-123

Drift Monitoring Graph

Defect Distribution

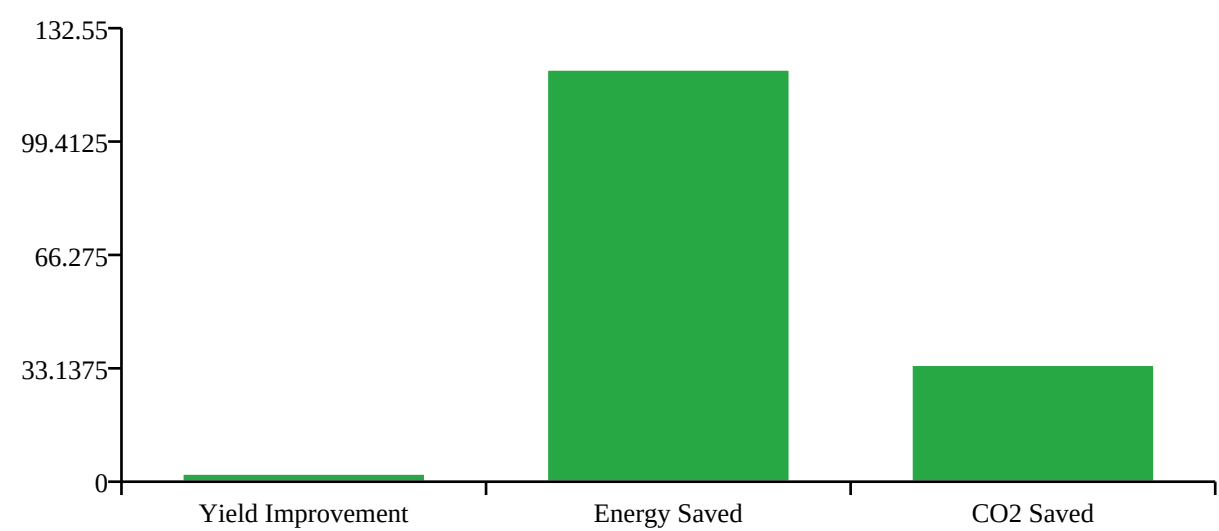

Root Cause Evidence

- Dominant activation region: Center
- Hotspots detected: 3
- Center-zone activation spike

# AutoYield AI Inspection Report

Inspection ID: TEST-123

## Operational Impact

## Recommended Actions Checklist

- ☐ Inspect center-zone thermal map
- ☐ Inspect wafer heatmap activation
- ☐ Verify center-zone temperature uniformity
- ☐ Review chamber pressure logs

## Technical Metrics Snapshot

|                                             |       |
|---------------------------------------------|-------|
| dashboard.summary.total_inspections         | 12    |
| dashboard.summary.avg_confidence            | 0.74  |
| drift.dashboard_summary.drift_events        | 2     |
| drift.dashboard_summary.avg_confidence      | 0.74  |
| impact.current_result.yieldUpliftPp         | 2.4   |
| impact.current_result.energySavedKwh        | 120.5 |
| impact.current_result.carbonPreventedKgco2e | 34.2  |

## Recent Inspection History (Last 10)

| Inspection ID | Timestamp  | Defect Class | Confidence |
|---------------|------------|--------------|------------|
| INS-1         | 2026-03-13 | Center       | 78.0%      |
| INS-2         | 2026-03-13 | Edge         | 62.0%      |
